Sub: TEQIP-II CoEs Review Meeting - Experts Comments - Action Plan
Ref: Your Lr No. AC/TEQIP-II/CoE/2014/457 dt.10.07.2014.

Sir,

Thank you very much for the valuable feedback. The members of the CoE had detailed discussions about the feedback. Based on these discussions, the following action plan has been drawn for the implementation of the recommendations made in the review meeting:

1. The CoE has three thematic areas, viz., Fuel Cells, Bio-energy and Solar Energy. All the three groups are working together and internal review meetings are being conducted for discussing the progress.
2. In each of these THREE thematic areas, the specific areas of research have been identified. Now detailed literature survey is being conducted to get the feedback from the earlier studies.
3. In order to link up the three areas, Hybrid systems are being explored. It is planned to visit the other CoEs working in the thematic areas and form inter CoE group for establishing a mechanism for collaborative research.
4. At the Institute level, an Internal Review Committee will periodically review and set the goals for effective functioning of the Centre.
